

# Articulated Hermes, the Hermit Crab

## 3D MODEL DESCRIPTION

Hermes may be a hermit in the name, but being a recluse never got in the way of being a good friend. Don't take his quietness the wrong way, he really enjoys your company.

- If you'd like your buddy to be a bit safer in his snatched house, consider glueing a **5mm x 1mm neodymium magnet** on both his back and the shell. That way, he won't fall off when you're shaking him around.
- This STL file is recommended for FDM Printers!
- 3D Printing Time: 1 Day 24 minutes
- 

## 3D PRINT FILE:

- Recommended Layer Height: 0.16 mm
- Recommended Perimeters: 3.
- Recommended Infill (%): 5%
